

**IN THE SPECIFICATION:**

Please amend the paragraph beginning on page 16, line 8 as follows:

Referring now to FIGURE 10, compound 210 is delivered into a body passageway A via balloon 250. Balloon 250 includes one or more slots 260 to allow delivery of compound 210 into body passageway A. Balloon 250 can be used to both deliver compound 210 and expand tubular member 200, or be used in conjunction with another balloon or tubular member expanding device.

B<sup>1</sup> Due to the properties of the PDGF inhibitor, local delivery of the inhibitor by a stent is highly advantageous. The balloon includes at least one opening to allow delivery of compound 210 from an interior of the balloon to the body passageway.
